Introduction

QUANTUM ACTIVISM VISHWALAYAM

Global Home for Transformative Education & Living

Quantum Activism Village Foundation, Jaipur, India

Global headquarters of Center for Quantum Activism

Preamble

In the past few decades science is undergoing a major paradigm shift from Newtonian/behavioral to a Quantum/ transpersonal one. The matter is everything view is giving way to primacy of consciousness. Quantum science has given scientific validity not only to our potential oneness but also to our subtle experiences of feeling, meaning, archetypes, and spiritual wholeness. According to the *Quantum Worldview*, the creative exploration of these experiences propels us toward a transformational mindset.

Quantum Activism is a revolutionary idea, based on this knowing, that is as simple in its construct as it is audacious in what it can achieve-- simply a complete transformation of the world, as we know it.

Background

Quantum Activism is an idea that was born out of the path-breaking work by Dr. Amit Goswami, Ph.D., former professor of physics at the University of Oregon in USA, to connect the domain of Science with that of Spirituality and propose a new model of education and living that has the potential to formulate out-of-box solutions for the seemingly complex issues that the world faces today.

Dr. Goswami is the author of several books e.g. “Quantum Doctor”, “Quantum Economics”, “Quantum Creativity”, “Everything Answer book” and is a central protagonist in award winning documentaries like “What the bleep do we know”, “Quantum Activist” and “The Dalai Lama Renaissance”.

His insights and teachings available in the form of many books and videos/films are a continuum with the world's wisdom traditions, specially the Indian Vedanta/Yoga/Buddhism tradition. In other words, the integration of science and spirituality that Goswami teaches has a lineage extending to five thousand years. It is Amit Goswami's teachings that will form the backbone of the transformative education we offer.

The central theme of Quantum Activism is the primacy of Consciousness over Matter. Whereas ordinary activism concentrates on changing the society without affecting the activist,

QUANTUM ACTIVISM seeks societal change through the power of SELF TRANSFORMATION, where each one of us works purposefully to become "the change that we want to see" to paraphrase Mahatma Gandhi.

While western Science and Technology have given us phenomenal materialistic prosperity and helped a large part of world's population to overcome the survival issues but they have also brought to us life threatening challenges of shortage of resources, self-destructive tendencies and a huge alienation of humans from each other. The singularly materialistic pursuit offers no sustainable solutions and so, many have started looking to the wisdom of the ancient cultures and civilizations to find real answers.

We in India have always known about the primacy of consciousness in the matters of the world and the interconnectedness of everything. That formed the basis of all our education and living in the distant past. "Vasudhaiv Kutumbakam" (World is a family) was our guiding principle but somehow this knowledge was lost to the world during its passage through the cycle of unprecedented growth in modern science and technology.

Quantum Activism is based on the solid foundations of Quantum physics discoveries and it re-establishes the primacy of Consciousness over matter. It integrates the sophistication of modern science and technology with the spiritual wisdom of the ancient civilizations and provides a robust framework for tackling the hitherto paradoxical challenges in all areas of life, be it Healthcare, Business & Economics or Societal self-governance.

To help transform the worldview, the Quantum Vishwalayam is bringing a custom-made recipe for the working professionals, educationists and other talented service-minded individuals to come forward and learn, practice and teach this system of Self Transformation leading to Professional and Social Transformation.

Briefly, the purpose of transformational education is to help bring congruence into your life, congruence between how you think, how you live, and how you make your living. You can do it all using quantum principles, integrating science and spirituality in your life.

TRANSFORMATIVE EDUCATION

Rationale and Key Elements

TRANSFORMATIVE EDUCATION

The Rationale

The human condition is fundamentally burdened by three instinctual and socio-cultural conditioning:

1. Brain circuits of pleasure seeking and associated addiction circuits;
2. Negative emotional brain circuits of anger, violence, domination, jealousy, competitiveness, etc.; and
3. Ego-persona conventionally referred to as “me” as opposed to our more present centered subjective first-person experience that we refer to as “I.”

Fortunately, says the quantum worldview backed by the spiritual traditions of India and the world, human beings are also gifted by potentialities of much positivity that come to us as subtle internal experiences—feeling, meaningful thinking, archetypal intuitions such as love, beauty, truth, wholeness, and abundance, the state of flow, and creative and spiritual “oneness” experiences. When humans explore these potentialities, their negativity is transformed into positivity. In spite of all the havoc human negativity has historically created, the cultivation of the positive has given us much advances of civilization as well.

The more recent prevalence of the worldview of scientific materialism—matter is all there is—in the academia has unfortunately undermined the cultivation of the positive potentiality and decidedly contributed to making our people and society as primarily transactional: “what is in it for me?” This has led to crisis conditions in education, health, economics, and politics, and is now threatening human civilization itself.

Even more recently, by several estimates, about fifteen percent of the human population of the world, most of them professionals and students on the way to becoming professionals have found dissatisfaction in the materialist me-centered way of being and are looking for alternatives. Many philosophers, well-meaning teachers, and even some spiritual gurus are attempting to respond to this thirst for transformative wisdom. Unfortunately, their teachings are arbitrary, at best based on old and new philosophical insights and common sense, seldom supported by scientific data, and seldom illustrated by “walking the talk.” How do you know which one to follow and which one will work better for you? You don’t. The result is utter confusion.

Enabling space for Transformative Education

Quantum Activism Vishwalayam is envisaged to be a model space for experiential learning and living, based on the principles and framework of “Quantum Activism”, proposed by the eminent Quantum physicist Dr. Amit Goswami, Ph.D. in his path breaking work on this subject.

The key elements of this framework integrate the findings of theoretical Quantum physics, developed in the scientific laboratories of the modern world with the wisdom enshrined in the ancient spiritual treatise originating from the civilizations which largely developed in the lands of India and surrounding regions.

The courses and pedagogy are to be based on the solid foundations of Science and the essence of the ancient traditions of learning in an Ashram while cohabiting with your teachers and co-participants. The decade old Quantum Activism movement, launched initially in USA by Dr.

Goswami, has now found its permanent home in Jaipur, India where the world headquarters of the Center for Quantum Activism has been established and a very ambitious plan to establish a global education center **Quantum Activism Vishwalayam** (*home of the world* in Sanskrit) is being launched. This is the next big leap, necessitated partly due to the reluctance of the traditional academe to change its materialist ways. Our Vishwalayam will give students professional level transformational training in consciousness and the quantum worldview with an emphasis on quantum living, and the exploration of wholeness in their professional pursuit, no less. To make this educational model more robust, it is also being integrated with the setting up of a Quantum Village, which is meant to be a self-sustained community living space developed from the ground up based entirely on the tenets of the Quantum worldview.

A group of service-minded professionals in India, Argentina, Brazil, North America and Europe, who have resonated with this and have been learning with Dr. Goswami, the tenets of this new educational and living paradigm, have come together to manifest this dream of the universal consciousness through the initiation of a movement known as Quantum Activism. The objective of Quantum Activism is to use quantum scientific principles (in total harmony with the teachings of the wisdom traditions) to transform the human self and society.

The quantum worldview confirms the vision of Sri Aurobindo that for the past few millennia, the evolution of our civilization is moving toward the evolution of our mind from a rational mind to an intuitive mind that integrates rationalism and emotions. Accordingly, our long-range vision is to build a quantum society where the intuitive mind prevails.

Key Elements for Experiential Learning

Every student, be it for the foundational learning, professional and applied education or for research, teaching and knowledge creation aspects, will go through a 1 Year “Professional Certification Program in Quantum Science and Conscious Leadership” directly from Dr. Amit Goswami who will be assisted by domain experts, handpicked and trained by him.

This program will comprise of 2 semesters, each of which will start with a 10 days’ PROXIMITY PROGRAM, modeled on the Gurukul learning principles of ancient ashrams in India where the knowledge seeker lived with the teacher and other participants and received experiential knowledge. It also helps in creating the Quantum connection bond that is so essential for deriving the full transformational benefits.

To facilitate a well rounded professional development, the Proximity program will be followed by online and video courses and an opportunity to work on some practical projects connected to the “Quantum Activism Village”, which is being set up as an integral part of the program to showcase “Quantum worldview in Action”.

A photograph of a chalkboard with a lightbulb placed on it. The lightbulb is positioned inside a large, hand-drawn white thought bubble. Below the main thought bubble are three smaller, hand-drawn white circles, suggesting a sequence of ideas or a process. The chalkboard is framed by a wooden border, and the background is a dark, textured surface.

THE EDUCATIONAL PROGRAM

Program Requirements and Next Stage

THE EDUCATIONAL PROGRAM

We will give transformational training in three different professional areas consisting of both proximity and distance learning:

1. Quantum Integrative Medicine and Quantum Integrative Psychology,
2. Quantum Economics and Business, and
3. Quantum Society consisting of the creative arts, the humanities, politics, education etc.

So-trained professionals in all three areas will have an opportunity to co-create a Quantum Activism Village for conducting their professional and personal lives according to the quantum principles.

The first year proximity training will take place in 2 segments each marking the beginning of a semester, 1 in autumn (September) and 1 in winter (February), each consisting of 10 days. The first two will offer 5 and 3 course offerings respectively, each course consisting of two days and 12 contact hours between the teacher and students; following the 10 days there will be 4 months teaching via internet in each semester. Dr. Amit Goswami himself will teach with the assistance of Valentina R. Onisor, M. D., consultant of integrative quantum medicine, and Anil K. Sinha, M. Tech, an engineer/consciousness researcher and business/life coach. The last 4 days of the 2nd semester is for integration and transformation in preparation for quantum living and building the quantum village community. We expect to train about 100-200 students per year.

The objective of the program is to train emissaries of the quantum worldview to the Indian society and the world.

Here are more details:

Year 1

Preparatory Phase

Enrollment Month - 12th of July - 31st of August, 2018

1. Viewing the documentary *The Quantum Activist* and the video series *The quantum worldview—introduction*
2. Reading Goswami's book *The Everything Answer Book*

The First Year contains:

1st Semester- Self development

The objective is to take the student beyond the base-level human condition. We teach you how to center your life in the processing of meaning, positive emotions and

archetypal soul-satisfying purposeful pursuits instead of excessive information processing, negative emotions, and me-centeredness and be happy and intelligent in the process. In short, we teach you right thinking and right living in congruence integrating science and spirituality in your life.

2nd Semester- Professional development

We teach you quantum tools of additional professional competence in your area so that you can employ new unexplored potentialities in your professional practices. In short, we teach you right livelihood, a way to earn livelihood that is in congruence with how you think and live.

Integration and transformation preparatory to building the quantum village will also occur in the 2nd semester. You will develop the concepts of the project that you will later pursue for the quantum village you will help build.

SEMESTER 1

August 31st – January 15th, 2019

Proximity Courses: August 31st- September 9th, 2018

1. **Science and Spirituality:** In this course, students will explore the basics of quantum physics, consciousness and self; the science of experience; and the archetypes.
2. **Quantum Meditation:** In this course, students will learn a variety of meditation techniques, their value, and objectives.
3. **Quantum Creativity and the Science of Manifestation:** In this course, students will explore creativity in science, arts, healing, business, and spiritual explorations. Furthermore, students will learn to scientize the teachings of the Bhagavad Gita, the Upanishads, Yoga Sutras, and Buddhism.
4. **Quantum Biology and Neuroscience:** In this course, students will seek to examine questions including “What is life?” “How does the brain work?” and “How can I make the brain work better?”
5. **Quantum Spirituality:** In this course, students will be introduced to a new spirituality for worldly pragmatic people centered on exploring archetypes, the integration of dichotomies, inclusivity and wholeness; and quantum enlightenment.

Video Courses

1. **Living Quantum Spirituality:** This course will teach students to dive deep into quantum principles and practices to attain spiritual transformation.
2. **Introduction to Quantum Activism.** This course will explore the essence of self and professional development using the quantum worldview.

3. **Physics of the Soul:** In this course, students will examine the quantum science of reincarnation.
4. **Happiness, Intelligence and Quantum Enlightenment:** In this course, students will explore the scale of happiness and how they might climb it via the exploration of the archetype of wholeness.

During the 4 months following proximity education, we will continue online. Students will have textbooks to read, homework to do and discuss, and also complete the video courses. Local students can meet. International and local students can discuss issues with teachers' guidance at a students' forum set up for this purpose. Students can communicate directly with teachers via email.

There will also be a monthly webinar of questions and answers with each one under the guidance of one or more of the three teachers.

At the end of the four months students will be required to write a term paper of approximately 3000 words showing a) mastery over the material; b) integration with their existing belief system; and c) a review of how the course contributed to the student's personal growth for each of the 9 courses completed.

SEMESTER 2

February 1 – June 15, 2019

Preparatory phase: January 16-31, 2019

Proximity Courses: February 1 - 10, 2019

1. **The Meaning and Purpose of Life, Self, and Society:** In this course, students will explore evolution, reincarnation, and civilization.
2. **Quantum Yoga:** In this course students shall be instructed in Chakra psychology, the creativity of the vital, and applications for health.
3. **Quantum Leadership and Entrepreneurship:** In this course, students will learn to combine both creativity and love in leadership as well as explore power, entrepreneurship, and the archetype of abundance.

Video Courses

(Students will complete two courses from within their concentrations and one each from the remaining concentrations for a total enrollment of four video courses each.)

1. **The Quantum Doctor:** Students will receive an introduction to Quantum Integrative Medicine.

2. **Quantum Economics:** Students will explore an extension of Adam Smith’s capitalism to include the subtle economy, the archetype of abundance, and unity consciousness.
3. **Quantum Education:** Students will learn to redefine education within the quantum worldview by understanding and embracing the “Five I’s”: inspiration, intention, intuition, imagination, and insight.
4. **Quantum Health Management:** Students will learn how to become their own quantum doctors.
5. **Quantum Politics:** Students will explore politics according to the quantum worldview from elitism to real democracy.
6. **Shallow Ecology, Deep Ecology, and Emotional Intelligence:** Change in consumerism will need both shallow ecology—taking care of our external environment—and deep ecology—taking care of our internal environment. Students will explore both types.

The program of online education following the proximity education will remain the same as semester 1 except that there will be a monthly webinar in each of the three professional groups and the term paper will reflect the student’s professional development.

COMPLETION

Following the proximity period, students will complete the requirement for each course, proximity and video, as in semester 1. Additionally, students will submit a paper on their group project and a final paper each of approximately 3000 words on their educational experience for the whole year. After the successful completion of the 1st year, the students receive a Certification in “Quantum Science and Conscious Leadership.”

Note: Successful participants will also receive a certification as a Quantum Activist Trainer.

OUR FACULTY

In the first year Certification program of Quantum Activism, which is really providing the foundation of this unique program to learn and practice the tenets of Quantum Living, the students will have the privilege of learning directly from Dr. Amit Goswami, Ph.D. He will be assisted by the following two teachers who have been hand-picked and trained by Dr. Goswami:

1. **Dr. Valentina R. Onisor**, MD, Consultant in Integrative Quantum Medicine
2. **Anil K. Sinha**. M.Tech., Consciousness & Pyramid Energy Researcher, Business/ Life coach

PROXIMITY COURSE REQUIREMENT

Each Semester begins with 10 days of Proximity Courses. This is a **mandatory and critical part** of the entire course. The concept has been designed with a lot of thought and is modeled on the Gurukul learning principles of ancient ashrams in India where the knowledge seeker lived with the teacher and other participants and received experiential knowledge. It helps in creating the **vital quantum connection** that is so essential for deriving the full transformational benefits.

However, in some exceptional cases, students with extenuating circumstances (mothers with small children is an example) - to be determined on a case-by-case basis- may apply for proximity waiver, that is, for the proximity courses to be replaced in part by reading material such as textbooks, video courses (if available) and in part by intensive tutoring (similar to the Oxford model) scheduled individually (30 hours per semester) via Face Time or Skype. This will require an additional fee to cover the extra cost of tutoring and will also be subject to availability and hence will be granted on first-come first-served basis, based on an express request from the student. This exemption shall be granted at the sole discretion of the Admissions board.

Our Vision for the Next Stage

Overview of Master's and Ph. D program

The Quantum Vishwalayam is a unique concept in Transformative Education where the experiential course work, based on the foundation of solid theoretical Quantum physics, provides a portal into creating and sustaining a community of transformational teachers and community workers.

We envision setting up further training at the second stage in each of the above-mentioned areas, culminating in a Masters degree and, at the third stage, as the Quantum Village is ready to operate in full bloom, to institute a Ph. D. granting full-fledged transformational educational program. The faculty for the Masters and Ph. D. program will be expanded to include eminent international experts and we fully intend to have an international student body as well.

A Glimpse of The Master's Program*

Students will take an additional sixteen courses (six from their major) to choose from a selection of offerings from the following, some proximity, some video (others may be added later on) during Year Two. Students will write a Master's thesis on a Quantum Village project of their choosing under faculty guidance in their final semester. There will be a distinguished visiting faculty in addition to our core faculty to teach these courses and guide the thesis work.

Quantum Health:

1. Quantum Energy Medicine
2. Nutrition and Meal Preparation
3. Vital Anatomy and Physiology
4. Integration of Ayurveda and Chinese Medicine
5. Mind-Body Medicine
6. Quantum Psychology as a Scientific Basis for Transpersonal Psychology
7. The Quantum Science of Happiness and Enlightenment
8. Quantum Energy Psychology
9. Quantum Psychotherapy and Counseling Techniques
10. Past Life Regression Therapy
11. Relationships
12. Science of the Heart and an Answer to Cancer
13. Women's health and awakening of consciousness - for women only

Quantum Economics and Business:

1. Quantum Entrepreneurship
2. Quantum Agriculture
3. Environment and Quantumizing Shallow Ecology
4. Arthashastra
5. Quantum Strategic Planning for Business Start-ups
6. Quantumizing the Business Workplace
7. Quantum Economics Business Coaching
8. Emotional Intelligence for Business Leaders
9. Research in Vital Energy and New Energy Technologies
10. Sacred Geometry Technologies

Quantum Society:

1. Logos, Mythos, and Ancient Knowledge Systems
2. The Evils of Euro Modernism

3. The Meaning of Life
4. Quantum Life Management
5. Quantum Life Coaching
6. Archetypes and Enneagrams and Dream Analysis
7. Value Education and the Art of Quantum Living
8. Astrology and the Archetypes
9. Awakening of the Heart through Art and Music
10. The Healing Arts
11. Music Therapy
12. Design Arts
13. Quantum Leadership in Politics

Beyond Master's: Ph.D. and Life Management Program*

Ph.D. Program in Three Sectors: Quantum Health, Quantum Economics and Business, and Quantum Society

At this level, we will require research in a well-defined project and publishable results. The anticipated timeframe is 2-5 years. The Ph.D. program can be carried out with any of the instructors (both core and visiting faculty) of the student's choice. Final evaluation will be conducted by a select committee.

Life Management:

Here, we will institute the Guru-disciple form of individualized education in the style of what is called *gurukula* in the Indian spiritual tradition of education with emphasis on the tangled hierarchical relationship between the teacher and student for a few select students. The Life Management Program will be conducted only by specially qualified faculty.

*** NOTE: These courses will be launched on completion of the statutory process requirements**

Quantum Village
Sustainable Community for
Heart-based Creative Living
(Quantum worldview in Action)

Kashif Afridi

QUANTUM VILLAGE: Sustainable Community for Heart-based Creative Living

The Quantum Village is envisioned to create a harmonious and self-sustaining space for visionary transformational leaders. The village will support the leaders in their quest for inner transformation and evolution of the self as well as help them express their creativity through new knowledge creation and service. Their creative actions may relate to community service, health and wellness, life education, business and economics, community wealth creation, environmental care, animal welfare, energy management, and any other endeavor that has an impact on holistic living and wellbeing.

The Quantum Village will host a global learning center in the form of Quantum Activism Vishwalayam. This will provide an integral space for learning, research and knowledge creation in the manner of the ancient gurukula while the Village in general will be like a living laboratory where this knowledge will find creative expression and dissemination. It will provide opportunities for the students and teachers to demonstrate the new way of living through the Quantum worldview. Over a period of time it is expected to spawn several such Quantum communities all across the world.

The key elements of life in the Quantum Village are to be designed to help all residents, teachers and students, as well as the nearby local populace adapt to a new way of living:

- that acknowledges both matter and spirit as a seamless web of reality
- that integrates the best of the ancient knowledge systems and the modern science and technology, and
- that helps each participant to realize his or her highest potential.

Residents of the Quantum Village would be both producers and consumers of goods and services required for the collective needs of the Village and also generate surpluses to serve the society at large. Payment for goods and services would occur by using a combination of currency and work contribution, thereby deploying the unique gifts of each individual.

The Quantum Village would serve as a platform for developing a new economy of subtle energies that addresses the holistic needs of humans, encompassing all their 5 bodies and faculties of sensing, feeling, thinking and intuiting as a route to progress and growth with love, happiness and intelligence.

The Quantum Village communities will recognize the supremacy of consciousness in all life matters and see the material phenomena as its natural manifestation. The eventual purpose is to evolve human societies all over the world to live the quantum way, with meaning and purpose, with intuition and creativity, and with the heart integrated with the head.

The villagers' daily pursuits of meeting their individual and collective needs are designed to be balanced, non-exploitative, and would cover the following impact areas (and any other related ones):

- Healing the Earth- Environment
 - Forestry
 - Smog
 - Forest Fires
 - Natural Soil Regeneration and Balancing
- Healing Architecture
 - Sacred Geometry of Spaces
 - Researching Ancient and Traditional Structures for their Effectiveness
- Healing the Water Resources
 - Water Harvesting
 - Weather Balancing through Radionics/ Meditation
 - Underground Water Channels
- Healing the Energy Use Paradigm
 - Renewable Energy-Wind/ Solar/ Bio
- Healing Food Sustainability-Agriculture
 - Energy Farming
 - Sustainable Agriculture based on Ancient Practices
 - Caring for Cows
- Healing Education
 - Value Education
 - Improving Receptivity and Retention
- Healing Economic Pursuit of Wealth and Money
 - Spiritual Entrepreneurship
 - Less Currency Transactional System Based on the Essence of Barter System
- Healing Humans
 - Physical Health
 - Mental Health
 - Emotional Health
 - Spiritual Health
 - Peak Performance Potential
- Healing Relationships
 - Working through Archetypes
 - Enneagram Counseling
 - Entangled Hierarchy of Social Interactions

The Quantum Village will be co-created by the collective participation of the students and teachers of the Quantum Activism Vishwalayam who will later also provide consulting support to others who wish to create similar communities elsewhere in the world.

FACULTY PROFILES

Our Faculty:

Dr. Amit Goswami

PhD, Retired Professor, University of Oregon,

Dr Amit Goswami is a retired full professor from the University of Oregon's Department of Physics where he served from 1968 to 1997. He is a pioneer of the new paradigm of science called "science within consciousness," an idea he explicates in his seminal book, *The Self-Aware Universe*, where he also solves the quantum measurement problem elucidating the famous observe effect. A prolific writer, teacher and visionary, Dr. Goswami has appeared in the movies *What the Bleep do we know?*, *Dalai Lama Renaissance*, as well as the award-winning documentary, *The Quantum Activist*.

Dr. Valentina R. Onisor

MD, Consultant in Integrative Quantum Medicine

Dr. Valentina R. Onisor, MD, is a specialist in Family Medicine, Acupuncture and Chinese Medicine, Ayurveda, Yoga Therapy, Aromatherapy, Apitherapy, Tachyon Advanced Technologies. She is also a Senior Yoga and Meditation Teacher, Relationships Coach, Universal Consciousness Ambassador CSETI and Consultant in Quantum Integrative Medicine. With over 16 years of experience in the field, she has traveled worldwide, and has successfully integrated in her practice various branches of ancient medicine, traditional Yoga, Meditation and Consciousness Development Methods.

Anil K. Sinha

M.Tech., Consciousness & Pyramid Energy Researcher, Business/Life coach

Anil has over 35 years of rich and diverse experience of leading Organizational Transformation initiatives for large, global corporations. He is actively involved in studying and promoting the field of Quantum Science Applications for Holistic Health, Wellness and Personal Optimization for individuals & communities. He has co-founded a unique Meditation Lab at Pyramid Valley, Bangalore.

Dr. Amit Goswami, Ph D

Degrees

PhD, Calcutta University (1964)

MSc (Class I) Calcutta University (1960)

Positions Held

Director of the Center for Quantum Activism (2009 to Present)

Associate and Full Professor, Department of Physics, University of Oregon (1968-1997)

Instructor and Assistant Professor of Physics, Case Western Reserve University (1963-1968)

Profile Overview

Amit Goswami is a theoretical nuclear physicist by training with numerous publications in that field. He is an expert on quantum physics and discovered the consciousness-based solution of the quantum measurement problem. He is a pioneer of science within the primacy of consciousness. He has developed integrative versions of biology, medicine and psychology, integrating all the different factions of each field. Amit has also developed an economics of consciousness, a very timely extension of Adam Smith's capitalism. He is a quantum activist spreading the message of the new integrative science with books, films, lectures and workshops world over.

As a Leading Consciousness Researcher

Amit Goswami's greatest contribution is the discovery of how consciousness, which according to the quantum worldview is the ground of being, can be embodied in the world. He is a leading researcher in the new paradigm of science within consciousness. Amit's first book on consciousness research *The Self-Aware Universe* is a seminal contribution to the post-secularism integration of science and spirituality. Subsequently, he wrote *The Visionary Window* and *God is not Dead* as a reaffirmation of a spiritual foundation of the world. His book *Creative Evolution* is a

tour de force integration of Darwinism and (non-creationist) intelligent design ideas of evolution. He wrote *Physics of the Soul* giving the world a viable scientific model for reincarnation. And, in *Quantum Creativity* he develops a science for the creative process and spiritual transformation and enlightenment.

As a Leader of Economics and Business Workshops

Amit Goswami's book *Quantum Economics* is nothing less than a paradigmatic conclusion of Adam Smith's pioneering ideas of how capitalism works. Amit's workshops for economics and business consist of training corporate professionals and consumers in quantum economics with an emphasis on developing a subtle energy sector of the economy that solves the problems of capitalism with the business cycle, sustainability, ethics and innovation, and elitism. He helps businesses to develop products of vital energy. He teaches corporate leaders about the new economics including the emphasis on meaning and values necessary for unleashing creativity.

As a Leader of Quantum Activism

Amit founded the Center for Quantum Activism in Eugene, Oregon and wrote the book *How Quantum Activism Can Save Civilization* to begin the worldwide movement called Quantum Activism. Currently, he is training a whole new generation of quantum activists in the North America, Argentina, Brazil, Mexico, Italy, the Czech Republic, the UK, and India. He has trained over a thousand quantum activists all over the world.

As a Visionary of Integrative Medicine

Amit wrote the book *The Quantum Doctor* which is rapidly becoming a classic in integrative medicine. He gives frequent lectures at international conferences on alternative medicine. His upcoming book on preventive medicine, written in collaboration with Dr. Valentina R. Onisor, completes and revolutionizes this integrated view even further.

As a Visionary of Integrative Psychology

Amit's upcoming book *The Quantum Science of Happiness*, written in collaboration with psychotherapist Sunita Pattani, is an integration of all the different forces of psychology.

As a Teacher of Adult Spiritual Development

Based on spiritual experiences in 1973 and again in 1976 and 1985, Amit has developed his life toward integrating the scientist and the spiritual within himself. Today, Amit gives lectures and workshops on the integration of science and spirituality in one's personal life and how that can lead to adult spiritual development. His upcoming book *Quantum Spirituality* formulates a new path to spiritual happiness and enlightenment for pragmatic world-oriented people of the twenty-first century. His video course *Living Quantum Spirituality* is available on the internet, in India, and elsewhere, produced and distributed by Glide Wing Productions.

Books by Amit Goswami

Quantum Mechanics

The Self-Aware Universe

Science and Spirituality

The Visionary Window

Physics of the Soul

The Quantum Doctor

God is not Dead

Creative Evolution

How Quantum Activism Can Save Civilization

Quantum Creativity

Quantum Economics

The Everything Answer Book

Films

Amit Goswami has been featured in *What the Bleep Do We Know!?*, *Dalai Lama Renaissance*, and *The Quantum Activist*. He has appeared in numerous other documentaries.

Dr. Valentina R. Onisor, MD

Degrees

Doctor of Medicine, 'Iulian Hatieganu' Medicine and Pharmacy University, RO (2000)
Specialist in Family Medicine, RO (2004)
Acupuncture and Chinese Medicine Specialist, Center for Advanced Medical Research, RO (2008)
Aromatherapy Specialist, Natural Healing Institute of Naturopathy, CA, USA (2012)
Ayurveda and Panchakarma Practitioner, Yoga Therapist, India (2010)
Spiritual Counselor, Resonance Academy, Czech Republic (2005)
Senior Yoga and Meditation Teacher, Yoga Academy, USA (2008)
Relationships Coach, Yoga Academy, USA (2009)
Tachyon Advanced Technologies Expert, University of Integrated Science, CA, USA (2011)
Universal Consciousness Ambassador, Center for the Study of Extraterrestrial Intelligence, USA (2011)

Positions Held

General Medical Specialist (2000-2004)
Family Doctor (2004-Present)
Holistic Medicine Practitioner (Ayurveda, Panchakarma, Naturopathy, Apitherapy, Acupuncture, Aromatherapy, Yoga therapy, Tachyon therapy, New German Medicine) (2010-Present)
Yoga and Meditation Teacher (2008-Present)
Couple Relationships Coach (2009-Present)
Spiritual Psychology Advisor (2008-Present)
Leader of Advanced ET Contact and Study Groups (2011-Present)
Consultant in Quantum integrative medicine (2016-Present)

Profile Overview

Valentina is a practicing medical and holistic doctor and expert in consciousness awakening related sciences. She is an activist for raising the planetary level of consciousness through a practical blend of modern sciences and ancient spirituality. She is dedicated to helping women worldwide in raising their level of awareness and inner power. She has developed a unique system of spiritual healing, helping people to achieve enhanced physical strength as well as mental, emotional and spiritual liberation and freedom.

As a Medical Doctor and Holistic Medicine Expert

Valentina's years of allopathic medical practice led her to understanding that each human body is a genuine masterpiece. She soon realized the need for combining the allopathic view with an integrative approach for lasting results and in-depth healing. She was compelled to study human consciousness, psychology and energy medicine to fill in the gaps left by the mainstream medical approach.

Valentina has developed great understanding and empathy towards human suffering combined with an awakened spiritual insight related to the subtle causes of disease. She has developed a step-by-step method of holistic spiritual healing that allows for profound and long-lasting transformation and regeneration on all vibrational levels of a human being.

As a Couple Relationships Coach

Valentina's approach to couple relationships integrates spiritual principles, deep soul connection techniques, and esoteric teachings. She guides couples and individuals on a journey of self-discovery through finding their universal archetypes and revealing their unique life purpose and aspirations of completion. She helps people re-discover love as a universal and endless energy that creates the foundation of true happiness and fulfillment.

Valentina's workshops and lectures are also dedicated to women, emphasizing on increasing awareness about their essential role in society as keepers of family and spiritual traditions as well as channels of spiritual truth, elevated inspiration, and universal love. She helps women to evolve towards becoming truly empowered human beings of enlightened consciousness and compassionate souls. Valentina's innovative system of teaching has also helped women improve their overall mental and physiological well-being through natural therapies geared towards hormonal balancing and energetic processing.

As a Teacher of Yoga and Meditation

Valentina has made correlations between the ancient science of yoga, Ayurveda and quantum physics, using them as support for her workshops, classes and lectures. She guides individuals of all upbringings, religions and cultural backgrounds on a systematic and scientific journey of self-knowledge and continuous transformation. She presents traditional spirituality through the modern concepts of universal resonance, of a holographic multi-dimensional universe and non-localized consciousness. Together with Professor Amit Goswami, she set up the basis and developed the Quantum Yoga and Meditation advanced integrative system.

As a Quantum Activist

Valentina has been an acting consultant for the Center for Quantum Activism in Eugene, Oregon. By harmoniously blending advanced science with genuine spirituality in a down-to-earth and accessible manner, in a spirit of love and compassion, she is currently teaching a number of classes and workshops in North America, India, U.K, Italy, Argentina, and Brazil.

Books

Valentina is currently co-authoring four books with Dr. Amit Goswami: *The Quantum Doctor Comes Calling Again*, *Shallow and Deep Ecology: How Emotional Intelligence Helps*, *Quantum Spirituality* and *Science of the Heart and an Answer to Cancer*.

Expected date of publishing: 2020.

Anil K Sinha

Educational Qualifications

- B.Tech. Mechanical Engineering, Indian Institute of Technology (IIT), Kanpur
- M.Tech. Industrial and Mgmt. Engr., Indian Institute of Technology (IIT), Kanpur
- SAP HR Implementer and Trainer
- Certified Organizational Change Management Consultant
- Accredited MBTI Consultant
- Certified Coach for Leadership assessment and Targeted Selection
- Certified Facilitator for Psychotherapeutic Healing Modalities (e.g., Past Life Regression, Rebirthing, Breath Work, Self-mastery, etc.)
- Certified Quantum Activism Trainer

Professional Experience

Anil is an alumnus of IIT Kanpur, India with degrees in engineering and management, an IT Manager with a large PSU, and a Consultant to many large organizations in the public and private sectors as well as state government in the areas of IT Lead Organizational Transformation, Program Management and Change Management. Anil is also an accredited MBTI Facilitator, an Executive Coach and Facilitator for Executive Selection, Leadership Development, Executive Assessment and Development, as well as teaching management with a rich and diverse corporate experience of over 35 years.

His innovative and people-centric approach, combined with his strong technical background, has assisted many projects in increasing the effectiveness of their outcomes. Amongst his employers and clients have been global corporations (e.g., ONGC, Capgemini Consulting, Intel Technologies, KPIT, ASCII, and others).

He is actively involved in studying and promoting the field of Quantum Science Applications for Holistic Health, Wellness and Personal Optimization for individuals and communities. He has co-founded “Consciousness Engineering Research Foundation” at Pyramid Valley, Bangalore

which has established a Meditation Lab and a global conference on Quantum Energy Medicine. He teaches and facilitates the application of Consciousness Engineering for Personal Transformation.

Present Occupations

Quantum Coach & Personal Transformation Consultant

Consultant-Organizational Change Management,

Executive Assessment & Leadership Coaching, Training & Development

MBTI Accredited Facilitator

Co-founder and Mentor of a unique Meditation Lab at an International Meditation Centre, Pyramid Valley in Bangalore, India

Co-chairperson, Quantum Energy Medicine Conference in India

Profile Overview

As a Corporate Transformation Facilitator

Anil was instrumental in conceptualizing, designing, and implementing large organizational transformation projects significantly improving processes and bottom lines while empowering people to be more productive with greater ease in organizations such as Brooke Bond Ltd. and Oil and Natural Gas Corporation

As an Organizational Change Management Consultant

Anil brought in his special gifts of empathetically integrating organizational and personal needs to create unique strategic solutions for managing Organizational Change and Transition for large global corporations (e.g., Philips Semiconductors, Netherlands, Schneider Electrical, France, Outrigger Corporation, Hawaii, Tupperware, Malaysia etc.).

As a Leadership Selection and Assessment Facilitator and Coach

Anil has been on the panel of experts for a global Talent Management company DDI India Pvt., Ltd. and he has successfully managed several assignments for a number of companies like Genpact, ABG group and Adani group.

As a Spiritual Science and Consciousness Researcher

Anil's keen interest in exploring and pushing the boundaries of human potential realization has led him to scientifically explore the world of spiritual knowledge and practices since 2007. He has been an integral part of the growth of Pyramid Valley International, the unofficial headquarters of the Pyramid Spiritual Societies Movement for the last decade.

He is the cofounder of a nonprofit organization "Consciousness Engineering Research Foundation," which has established a unique Meditation Lab at Pyramid Valley to study and create practical applications of the tools based on the alignment of consciousness for areas like health, education, business, agriculture, food preservation, etc. He is involved in setting up authentic experiments to enhance the understanding of how consciousness works.

As a Quantum Personal Transformation Coach

Anil has been working with many clients in India and abroad to coach them in discovering and exploring holistic wellbeing solutions in the areas of business ventures and entrepreneurship, sports performance, better health through self-healing, and agriculture and food preservation. All the solutions are based on recognizing the primacy of consciousness and working through it.

As a Quantum Activist

Inspired by the work of Dr. Amit Goswami in promoting a recipe based upon the quantum worldview for bringing the world back from the brink of an imminent disaster, Anil has embarked, with a small visionary group of like-minded individuals, on an ambitious project of creating a Quantum Village and a Quantum Activism Vishwalayam to establish a living ecosystem for learning, practicing, and evolving a transformational blueprint for realizing a paradigm of the new worldview for a global audience.

Books

Goswami and Sinha, *Quantum Leadership: How to be an Entrepreneur in a Quantum/Spiritual Economy* (in preparation for publishing).

ADMISSION PROCESS

New
Curriculum
For
Conscious
Leadership
And
Happiness

ADMISSION PROCESS AND FEE DETAILS

One-Year Certification Program in Quantum Science and Conscious Leadership

Application includes:

1. Submission of formal transcripts from all previous institutions of higher learning (Bachelor's degree or equivalent);
2. Personal Statement (minimum 500 words);
3. Curriculum Vitae;
4. Online Application Form (<https://goo.gl/forms/DM3oIDpiWJJBtMaR2>);
5. Photograph and Official ID (Indian residents may submit a copy of any valid government issued ID; nonresidents must submit a valid passport copy).

Applications must be submitted by August 15, 2018 for full consideration.

All candidates for admission into the 2018-2019 Year-One Certification Program in “Quantum Science and Conscious Leadership” must complete the application form found at the following link: <https://goo.gl/forms/DM3oIDpiWJJBtMaR2>. Applicants may also utilize the corresponding link on our website at: www.quantumactivism.org. All other documents may be submitted via email to: support@quantumactivism.org or info@amitgoswami.org.

Fee Schedule

Fee Structure *	Indian Residents (INR)	Nonresidents (USD)	Payment Due
Registration (non-refundable)	50,000/-	\$500	At the time of application
Semester 1 Tuition	150,000/-	\$2,000	August 15, 2018
For Proximity waiver cases **	1,75,000	\$2,250	

Semester 2 Tuition	100,000/-	\$2,000	January 15, 2019
For Proximity waiver cases **	1,75,000	\$2,250	

*Fees include housing and meal plan during each proximity program period.

** Includes additional fee for students granted proximity program waiver as an exception

Payment Details:

Please make remittance in appropriate currency (lakh rupees for Indian residents and USD for all nonresidents) via wire transfer. Account information may be found below:

Account Name: Quantum Activism Village Foundation
Account Number: 918010044662801
Bank Name: Axis Bank Ltd
IFSC: UTIB0001388
Branch: Lalkothi, Tonk Road
Jaipur, Rajasthan 302019

If you have any questions or concerns, please do not hesitate to contact us as follows:

Website: www.quantumactivism.org

Email: support@quantumactivism.org

In person: Center for Quantum Activism, Global Headquarters
c-52, Keshav Enclave
Janpath, Lalkothi
Jaipur 302019

Telephone: +91 9610611611/+91 9828598888

A stack of seven old, worn books with various titles and colors. The books are stacked vertically, with the top one being a dark brown leather-bound book. The second book is black with the title 'STRONG AND FREE' embossed on the spine. The third book is a light greenish-yellow. The fourth book is a light brown/tan color with the title 'IN TUNE WITH THE INFINITE' embossed on the spine. The fifth book is a deep red color. The sixth book is a dark red/maroon color with the title 'THE TRANSFORMING FRIENDSHIP - LEATHERHEAD' embossed on the spine. The seventh book is a dark purple/maroon color with the name 'SHARP' embossed on the spine. The background is a blurred bookshelf with various other books.

COURSE CATALOG
Courses for
1 year Professional Certification Program

COURSE CATALOG

C1. Science and Spirituality (2 credit hours)

What is a useful worldview? That which can give us answers, solutions. The current matter-based worldview of science once gave us solutions but now is bogged down with many unsolvable problems demonstrating the need for a shift. Problems that prove especially difficult to address center around the definition of life and consciousness. The paradox-free interpretation of quantum physics (arrived at via the ideas of Werner Heisenberg, John von Neumann, and Amit Goswami) requires the introduction of a new metaphysics that consciousness, not matter, is the ground of all being. The subtle bodies are introduced, and we show how and why quantum physics applies to the macro-domain of nature. In this course, we will also demonstrate that if science is done within this metaphysics that integrates science and spirituality, solutions to these unsolvable problems can be found, and physics, biology, psychology, medicine, even economics and business administration can find common ground—a truly integral approach to science that includes the human spirit.

Topics:

1. What is Consciousness?
2. The Conceptual Basis of Quantum Physics
3. Non-locality and the Upanishads
4. The Concept of Discontinuity and Enlightenment in Zen Buddhism
5. The Role of the Brain, Tangled Hierarchy, and the Idea of Dependent Co-arising in Buddhism
6. Science within Consciousness: The Scientific Basis of Human Experiences and the Idea of Panchakosha (five bodies)
7. What is *Lila* or God's Play?
8. The Meaning and Purpose of Life
9. Science, Spirituality, and Transformation
10. Happiness, Intelligence, and Enlightenment

Suggested Reading: Goswami, *The Everything Answer Book; The Self-Aware Universe*

C2. Meaning and Purpose of Life and Evolution, Self and Reincarnation, and Society and Civilization (2 credit hours)

To begin this course, we consider the question, “What is life?” Then Darwin’s theory of evolution is discussed and debunked. Aurobindo’s and Teilhard de Chardin’s ideas of evolution of consciousness are introduced. The quantum theory of creative evolution is then developed in full.

In this course, we will also introduce a scientific theory of reincarnation based on the idea of quantum nonlocal memory. We will examine new data. We explain concepts such as *karma*, *guna*, and *dharma* and emphasize their importance.

The anthropology of the evolution of the mind and the rise of civilization is discussed in detail. The future of evolution is predicted.

Suggested Reading: Goswami, *Creative Evolution; Physics of the Soul*

C3. Quantum Creativity and Science of Manifestation (2 credit hours)

After a definition and a four-fold classification of creativity (situational and fundamental, outer and inner), we discuss the quantum theory of the creative process in some detail. The role of intuition, intention, and imagination is clarified. The science of manifestation is also clarified. We explore situational and fundamental creativity with scientific exploration as an example. As an example of inner creativity, the exploration of the archetype of love is chosen for the application of the creative process.

As a part of this course we also show how with the concept of quantum creativity the teachings of the Upanishads, the Bhagavad Gita, and Patanjali's Yoga Sutra come alive.

Suggested Reading: Goswami, *Quantum Creativity*

Additional reading: *The Bhagavad Gita; Patanjali's Yoga Sutra*

C4. Quantum Yoga (2 credit hours)

We usually change our body's position from its natural position to another particular structure. We have a natural tendency to do that when we need to develop certain feelings in our internal space. In the same way, the yoga poses (asanas) were created. During and after correctly preparing and practicing an asana, we will learn how to *feed-back*, watch a certain chakra and the respective feeling that is generated as a mutual feedback system. Directly related, we will discuss the Law of Resonance which is very applicable here: by changing the body structures to a certain position, we will help generate a transformation within the morphogenetic "software" created by consciousness with the assistance of purposive liturgical fields, precisely the way of the feelings we want. A fundamental secret of all forms of yoga is to create and maintain a process of resonance. We will thus approach yoga as a modality of resonance between the beneficent, superior aspects of the universe and the human being, considered to be an isomorphic copy on a smaller scale of the outer world.

Quantum Yoga facilitates a broad gamut of techniques that are extremely effective in restoring health, both physically and psychically. Many people have unfortunately accepted living with

smaller or bigger defects which limit them from experiencing life at its fullest. For yoga, even a disease is a gateway to achieving physical, emotional, mental, and spiritual health and harmony. We will explain the approach that yoga has to the process of healing. The approach is holistic and includes all the archetypes.

The course requires no preparation or knowledge about yoga. We will start with simple postures and gradually continue with more complex techniques. The postures are worked with in a meditative ambience, where the emphasis is on the inner experience of the energy-flows and states of consciousness. You will be given practical keys for understanding the meaning of the hidden symbolism of the yoga science and for correlating this information with the already known scientific knowledge.

C5. Quantum Biology and Neuroscience (2 credit hours)

This course is about the brain. The problem of how the brain gets its self is solved in the context of two paradoxes: the paradox of perception and the paradox of quantum measurement. We discuss how the brain is quantum.

We examine the two modalities of the self—the transpersonal self and the ego—with special emphasis on brain data and the nature of memory.

We review the subject of brain circuits and how the making of new brain circuits can transform us.

Finally, we take up the subject of the brains in the body and develop a science of the “heart.”

Topics:

1. Brain Anatomy
2. Are Humans Philosophical Robots?
3. The Paradox of Perception and How the Self and the Brain Co-arise in Awareness
4. Subjective Qualia
5. The Nature of Memory
6. How the Brain “Corrupts” the Self via Memory-Conditioning and Negative Emotional Brain Circuits
7. The Neuroscience of Reincarnation
8. How to Change the Brain and Make Positive Emotional Brain Circuits
9. The Heart: The Key to Spiritual Transformation

Suggested Reading: Goswami, *Quantum Neuroscience* (unpublished MS)

C6. Living Quantum Spirituality (2 credit hours)

This course begins with the basics of quantum physics and gradually draws in the student into the ways the quantum worldview integrates science and spirituality. This video course complements the proximity course on “Science and Spirituality.”

Suggested Reading: Goswami, *The Visionary Window; God is Not Dead*

C7. Happiness, Intelligence, and Quantum Enlightenment (2 credit hour)

Spiritual transformation is introduced as inner creativity—creativity directed to our inner dimension. We briefly discuss the journey from information to meaning to transformation and individuation and from IQ intelligence to emotional intelligence to supra-mental intelligence.

Topics:

1. The Spectrum of Awareness or Happiness
2. Quantum Spiritual Transformation as Inner Creativity—Creativity Directed to Our Inner Dimension
3. Exploration of the Platonic Archetypes
4. Journey of Individuation
5. Awakening of the Heart
6. The Archetype of Wholeness and Enlightenment of the First Kind
7. Quantum Enlightened Living as Living in Creative Flow
8. Self-realization: Enlightenment of the Second (Traditional) Kind
9. Practices

Suggested Reading: Goswami and Pattani, *The Quantum Science of Happiness* (unpublished MS)

C8. Quantum Activism (2 credit hours)

This video course is an introduction to quantum activism—activism intended to transform the self as one transforms the world. The course emphasizes the three quantum principles of transformation—nonlocality, discontinuity, and tangled hierarchy.

Suggested Reading: Goswami, *How Quantum Activism Can Save Civilization*

C9. Quantum Meditation (2 credit hours)

The field of quantum physics is considered to be on the leading edge of science and scientific research. Although Meditation and quantum physics seem to have nothing in common to many, meditation is the gateway to our “inner reality” or “quantum reality.” It serves as the bridge between the three-dimensional mechanistic external universe and the multidimensional internal

quantum universe. It opens us to our inner senses and enables us to perceive our quantum reality and experientially learn about the multidimensional nature of ourselves and our universe as well as long term meditation in an archetypal context as a journey toward the quantum self. Meditation has always been an integral part of spiritual teachings since ancient times. All spiritual traditions have an inner core or essence, and meditation is the first and foremost practice recognized therein. Meditation is the very foundation of spiritual science and it is the most fundamental of spiritual practices. It is the alpha and omega of “Sadhana” (spiritual practice). Meditation, more than a slow-down, is therefore the first step towards “awakening wisdom within” or what we call in the quantum science the “journey toward the quantum self.”

Meditation has been defined as “the state that appears whenever the flow of attention, which is oriented towards the target of concentration, becomes uninterrupted.” However, this definition carries the greatest degree of practicability as it represents a genuine common denominator for the various spiritual systems which have used meditation as one of the basic methods for individual development. Before anything, we will shed light upon the following topics:

1. What Happens with all our Mental Potential?
2. The Hypnotic Monkey
3. Mechanisms of the Mind
4. Concentration and Awareness
5. Quantum Attention and Mental Focus Training
6. Mental Hygiene
7. Creativity
8. Mindful Meditation—Meditation on the Subject

The Meditation Course is a systematic and practical approach to achieving success in meditation, combining theory and practice. After exploring the mechanisms of our own mind, we will experiment with various techniques of meditation, getting to know some of the obstacles on the path of meditation as well as some of the ways to overcome them. You will become aware of the great benefits that meditation brings to those who practice it correctly and will get glimpses of its effects within your being.

C10. Quantum Spirituality (2 credit hours)

Spiritual transformation is introduced as inner creativity directed to our inner dimension. We briefly discuss the journey from information to meaning to transformation and individuation, from IQ intelligence to emotional intelligence to supra-mental intelligence. We discuss quantum enlightened living as living in creative flow in the manifestation stage of the archetype of wholeness.

Topics:

1. IQ and Mental Intelligence

2. Do Women have Better Intuition?
3. How Information Processing and the Negative Emotional Brain Circuits Affect Our Intelligence
4. Inner Creativity
5. Remaking of the Brain: The Scientific Basis of Positive Psychology and Brain-based Emotional Intelligence
6. Advanced Emotional Intelligence: The Body and Chakras
7. The Heart Chakra and the Creative Exploration of Love
8. Is There a Mystic Heart? A Self of the Heart?
9. Awakening the Heart: Exploration of Love with Fundamental Creativity
10. Sexuality, Tantra, and Fundamental Creativity of the Vital: The Awakening of Kundalini
11. The Male/Female Integration
12. Integration of the Heart and the Brain: Supra-mental Intelligence
13. Spiritual Practices for the Awakening of Supra-mental Intelligence
14. Exploring the Archetype of Wholeness and Living in Flow

Suggested Reading: Goswami and Onisor, *Quantum Spirituality* (unpublished MS)

C11. Physics of the Soul (one credit hour)

The subject of this video course is reincarnation, its scientific theory, and evidence. In this course, we will begin with a scientific theory of reincarnation based on the idea of quantum non-local memory. We will examine new data. We explain concepts such as *karma*, *guna*, and *dharma* and emphasize their importance. We will also discuss related phenomena of near-death experiences and channeling.

Suggested Reading: Goswami, *Physics of the Soul*

C12. Quantum Leadership and Entrepreneurship (two credit hours)

What is authentic leadership within the quantum worldview and how do you, as an entrepreneur and business owner, achieve it? Our answer is this: via primarily quantum creativity that brings forth the 9 C's of a business leader in you that the businessman Lee Iacocca has identified for us. This is Part I of the course.

This course is based, also in part, on the leadership and management lessons derived from the *Bhagavad Gita* and other scriptural texts that will help guide students in bringing their business vision and practices in alignment with the purposive evolution of consciousness. How to recognize and fulfill one's dharma, how to lead from the heart as well as the head, and how to re-

position oneself in the marketplace, are among the topics presented and discussed in depth. Students will develop a blueprint to implement in their business.

The demands of leadership are ever increasing. More than ever, there is a need for the creating and living of inner balance. This balance is required to best handle the increasing expectations of the world. Without complete inner balance and the wherewithal and agility to use this as the ground of one's being in the world, sooner or later a person can find himself on the road to burnout or running the risk of going into a depression because his personal foundation is too weak. Imbalance results in being confronted with temporary or permanent physical complaints that take a lot of time to resolve.

Advanced quantum leadership is the ability to achieve and maintain character with an inner balance between one's personal and professional lives and to be of service in leading others.

This course assesses how developed you are as such a leader. It teaches you how to change attitudes and behaviors. It shows you how to increase your impact by building magnetic love-based charisma founded upon an authentic character centered in balance and harmony. It reveals how to anchor these states with the use of cutting-edge technologies from the fields of biofeedback, neuro-feedback, and aura balancing.

Finally, today's quantum leaders must also engage in entrepreneurial activities especially in the realm of the subtle economy, making vital energy, mental meaning, archetypes, and even spiritual wholeness as products of consumer interest.

How do you invite, attract and sustain abundance through innovation and monetization of subtle energy products and services? This part of the course examines the broad science of manifestation with its roots in downward causation, nonlocality, discontinuity, intuition, the fundamentals of neuroscience, and the elements of surrender. It delves into *Level 5 of Infusion of Subtle Energy*—vital energy extraction—and explores its applications for the manufacturing and distribution of new subtle energy products that preserve the vital energy essence of natural materials used in production.

Suggested Reading: Goswami and Sinha, *Quantum Leadership: How to be an Entrepreneur in a Quantum/Spiritual Economy*

C13. Quantum Economics (two credit hours)

This course explores in depth the concepts and principles of quantum economics. Students will understand the history of Adam Smith's capitalism, its historical parameters and limitations, current aberrations of capitalism in the global marketplace; and how a science formulated according to the quantum worldview offers both a foundational science and metaphysical framework for ushering in a new model of capitalism. The "New Capitalism" purports to: (1) lessen the frequency and magnitude of natural boom-bust business cycles; (2) reduce the gap between the su-

perrich and poverty-stricken; (3) reestablish a middle class with access to capital and more meaningful lives; and (4) develop a workplace culture conducive to innovation, emotional/psychological/spiritual wellbeing, and creating a sustainable social footprint.

Preparing consumers and businesses for the ushering of the new economics is also explored as part of the course.

Suggested Reading: Goswami, *Quantum Economics*

C14. The Quantum Doctor (two credit hours)

The purpose of the course is to demonstrate the scientific nature of conventional and alternative medicine (CAM) through the principles of quantum physics and the ways to integrate them to build a new integrative medicine for human beings. Naturally a new conception of human being, which is different from the concept of scientific materialism, will be presented.

Simultaneously, we develop theories of disease and healing. Clinical cases are presented and discussed.

You will study the foundational principles of ancient and even some relatively modern medicine modalities including the shared foundation and the contrast thereof.

The goal of the course is to educate and familiarize the participants with the principles of inner harmony, harmony with nature and spiritual harmony as foundations of healing. The key issue addressed here in great detail is the challenge of integrating these practices into modern lifestyles addressing present health conditions.

The course also addresses not only the evolution but also latest trends noted in the areas of healing sciences.

Suggested Reading: Goswami, *The Quantum Doctor*.

C15. Quantum Education (one credit hour)

The advent of the quantum worldview will have substantial impact on education: a shift from information processing to meaning processing, a revival of value education, the use of passion and positive emotions, the emphasis on cooperation in addition to competition, etc. We also emphasize the importance of the five I's: Inspiration, Intention, Intuition, Imagination, and Insight.

Topics:

1. From Materialist Transactional Education to Quantum Transformational Education

2. What Non-locality Means for Education
3. The Difference Between Educating Insentient Machines and Educating Sentient Humans
4. How Education Must Incorporate All Our Experiences: Meaning, Feeling, and Purpose
5. Integrating the Outer and the Inner in Education
6. The Quantum Relationship Between the Mind and the Brain and How Education is Impacted to transform from information processing to meaning processing
7. Teaching Students about Feelings in the Body and the Evolution of Instinctual Brain Circuits of Negative Emotion
8. The Quantum Self and the Importance of Intuition, ~~and~~ Archetypes, and creativity in Education
9. From the Three R's—Reading, Writing, and Arithmetic—to the five I's—Inspiration, Intention, Intuition, Imagination, and Insight

Suggested Reading: Goswami and Baccheli, *Quantum Education: The Five I's* (unpublished MS)

C16. Quantum Politics (one credit hour)

For quantum politics, we will find the root cause of the current crisis in politics the main source of which is rampant elitism. We will then develop a science of liberal democracy. Finally, we will show how political order can be restored via the participatory politics using the quantum worldview.

Topics:

1. Elitism: the political Crisis in the World
2. The Philosophical Roots of Democracy
3. How the Quantum Worldview can scientize Politics
4. E Pluribus Unum: I, You, and We
5. The Hard Problem of Transformation for a Westerner
6. Quantum Activism and the Journey from Transactional Politics to Transformational Politics
7. Moving Beyond Scientific Materialism: Quantum Politics is Participatory Politics
8. Saving Democracy with Quantum Politics

Suggested Reading: Goswami, *Quantum Politics* (unpublished MS)

C17. Quantum Health Management: How to be your own Quantum Doctor (one credit hour)

This course is dedicated to everyone genuinely interested in healthy living, and it refers to the awakening of the healing power that we all have within. The quantum worldview and the discon-

tinuous healing path to the supra-mental makes way to develop an integrative medicine that gives a metaphysical foundation for all types of therapies. The more we learn how to tap into our essence, the quantum self, the more we are open to realizing our immense potential to attain health and joy in life.

The state of health is a dynamic condition, an expression of harmony and equilibrium on all levels of the human being. Relatively speaking, a disease is an incongruence caused by lack of harmony in one's inner universe or with the macrocosm. Fundamentally speaking, disease is born out of the illusion of duality and ego. Quantum self-healing is an expression of supra-mental intelligence. Complete healing occurs the more we reestablish the fundamental equilibrium between the microcosms and macrocosm and the more we become aware and compensate damaging habits and resonances with beneficent ones.

We will learn how to regain our inborn potential by unleashing the power of the subconscious mind through techniques that allow one to consciously access the supra-mental level, *Vijnana-maya kosha*.

Topics:

- Preventive medicine
- Mental hygiene
- Meridian yoga
- Chakra medicine
- The quantum healing process
- The processes of entering into the meditative state and centering into the heart
- The power of prayer
- Positive thinking
- The alchemy of love, gratitude
- Acceptance and forgiveness
- Resonance and karma
- Methods of relaxation, rejuvenation and lifespan extension
- Natural methods and recommendations for a healthy living

Suggested Reading: Goswami and Onisor, *The Quantum Doctor Comes Calling Again* (unpublished MS)

C18. Shallow Ecology, Deep Ecology, and Emotional Intelligence (one credit hour)

Ecology is the logos of where we live. Shallow ecology refers to the ecology of our outer environment; deep ecology is about our psyche—our inner environment. In this course we bring the awareness of business producers and consumers alike toward wellness of both our inner and outer environments when considering both production and consumption. In particular, we treat the subject of emotional intelligence for business leaders in some detail.

Topics:

1. Shallow Ecology
2. Deep Ecology for Consumers
3. Deep Ecology for Business Leaders
4. What is Emotional Intelligence?
5. Why Emotional intelligence is Important for Businesses and Consumers Alike
6. What are Emotions?
7. Emotional Intelligence for Business Leaders
8. Exercises and Practices

Suggested Reading: Goswami and Onisor, *Shallow and Deep Ecology: How Emotional Intelligence Helps* (unpublished MS)
